SECTION 1: PREAMBLE & OPERATIVE LEGAL CLAUSE

This Policy document constitutes a legally binding contractual framework executed between Nexus General Insurance Limited (hereinafter referred to as the "Company", "Us", "We", or "Our") and the designated Policyholder (referred to as "You", "Your", or "Insured Person"). This insurance framework is operationalized in strict alignment with the information, disclosures, warranties, and explicit declarations captured comprehensively in the original signed Proposal Form submitted by or on behalf of the Insured.

In consideration of the timely and complete remittance of the premium values specified explicitly within the accompanying Policy Schedule, the Company hereby agrees to indemnify, pay, or settle valid claims under the specified operational parameters, subject always to the terms, conditions, deductibles, waiting periods, caps, and total co-payment margins set forth systematically across the twenty-plus pages comprising this master legal agreement.

SECTION 2: STANDARD DEFINITIONS (REGULATORY COMPLIANCE GUIDELINES)

The technical expressions defined hereinafter are universally applicable across all subsections of this contract and carry distinct legal weight during claim adjudication procedures:

Accident: An accident means sudden, unforeseen and involuntary event caused by external, visible and violent means.

Any one illness: Any one illness means continuous period of illness and includes relapse within 45 days from the date of last consultation with the Hospital/Nursing Home where treatment was taken.

AYUSH Hospital: An AYUSH Hospital is a healthcare facility that is recognized by the government and dedicated entirely to alternative medical practices conforming to specialized national standards.

Cashless Facility: A facility provided by the insurer to the insured where the payments of the costs of treatment undergone by the insured in accordance with the policy terms and conditions are directly made to the network provider by the insurer.

Condition Precedent: Condition Precedent means a policy term or condition upon which the Insurer's liability under the policy is conditional as a prerequisite.

Congenital Anomaly: Congenital Anomaly refers to a condition which is present since birth, and which is abnormal, medical, or surgical in nature.

Co-payment: A cost-sharing requirement under a health insurance policy that provides that the policyholder/insured will bear a specified percentage of the admissible claim amount. A co-payment does not reduce the Sum Insured.

Cumulative Bonus: Cumulative Bonus means any increase or addition in the Sum Insured granted by the insurer without an associated extra premium loading.

Day Care Centre: A day care centre means any institution established for day care treatment of illness and/or injuries or a medical setup with a hospital and which has full regulatory validation.

Day Care Treatment: Day Care Treatment means medical treatment and/or surgical procedure which is undertaken under General or Local Anesthesia in a hospital/day care centre in less than 24 hours because of technological advancement.

Domiciliary Hospitalization: Domiciliary hospitalization means medical treatment for an illness/disease/injury which in the normal course would require care at a hospital but is taken while confined at home under specific mitigating clinical parameters.

Emergency Care: Emergency care means management for an illness or injury which results in symptoms which occur suddenly and unexpectedly, and requires immediate medical attention.

SECTION 3: SPECIFIC POLICY DEFINITIONS & COMPUTATIONAL PARAMETERS

The parameters under this tier layout follow strict quantitative verification guidelines. The specific mathematical calculation for calculating allowable sub-limits relies directly upon variable coefficients relative to the core structural tier index.

3.1 Architectural Parameter Index Cluster 1

This sub-clause defines the operational parameter boundaries governing standard risk validation metrics. All analytical evaluations executed under this clause are directly mapped through network monitoring procedures to prevent indexing errors.

Operational Rule Index 1: Claims variable tracking under Cluster 1 evaluates base metrics using a continuous validation function where adjustments are strictly non-retroactive:

$$V_{\{index\}} = \frac{\Phi_{\{base\}} \times \lambda_{\{1\}}}{C_{\{incurred\}} + \delta_{\{1\}}}$$

3.2 Architectural Parameter Index Cluster 2

This sub-clause defines the operational parameter boundaries governing standard risk validation metrics. All analytical evaluations executed under this clause are directly mapped through network monitoring procedures to prevent indexing errors.

Operational Rule Index 2: Claims variable tracking under Cluster 2 evaluates base metrics using a continuous validation function where adjustments are strictly non-retroactive:
